LONGSHENG Glass & Vial Caps

Glass & Vial Caps

LONGSHENG offers the most comprehensive line of Glass & Vial Caps. Pharmaceutical Flip Off Seal Vial Cap is a kind of food bottle cap, used for sealing oral liquid, bottled infusion and food packaging. Pharmaceutical Flip Off Seal Vial Cap is an important part of food packaging, and it is also the place where consumers first contact with the product. Pharmaceutical Flip Off Seal Vial Cap is widely used in bottled products because it has the function of keeping the contents sealed and anti-theft opening and safety. high-quality seals that consistently achieve reproducible and safe container integrity for drug products while ensuring low levels of bio-burden and particulates, which may help make drugs safer for patients.

When you are looking for a high-quality and dependable vial caps, LONGSHENG can provide the best product for your application. LONGSHENG can also accommodate the custom design and manufacturing of vial caps.

About LONGSHENG®

Jiangsu Longsheng Pharmaceutical Packaging Materials Co.,Ltd,located at Yangzhong city,Jiangsu province,founded in 2007,is specialized in the development,production and sales of pharmaceutical packing materials.The company has a total investment of RMB 50 million yuan,with the total assets exceeding RMB 2 billion yuan.It covers an area of 70,000 m2,standardized plant 20,000m2,including 8,000m2 plant(under grade C background partial grade A).Now the company has over 300 employees,including 55% of senior college or above ,and several experts who have been engaging in pharmaceutical packaging for a long time.Our products are widely supplied to over 400 pharmaceutical enterprises all over the world,and sold far to Asia,America and east Europe market,in a leading position of the pharmaceutical packaging industry in China.

Aluminum Cap

For the correct closure of medicine bottles, aluminum cap are used for consistent and reliable crimping in a controlled environment.

Infusion Cap

Our Infusion Cap for plastic bottle has 3mm and 5mm thickness in its welding surface and the cap has the advantages of high safety, no leakage, no pollution, easy opening and so on.

Contact Lens

Container

a kind of polypropylene packaging material for storing contact lenses, is widely used for storing contact lenses with short abandoned cycles.

- A variety of closure styles and sizes for your research application.
- Manufactured from the highest quality raw materials
- Products include aluminum seals, rubber stoppers and plastic screw caps.

Infusion Bottle Hanger

Infusion bottle hanger when used for clinical transfusion bottle sets, it is characterized by using planar disc structure, the suspension loop, the nursing bottle ring, ring of bottleneck of three different diameter circle bearing each other in the same plane.

Aluminum Cap

Mesopore Series Aluminum Cap

Product	mesopore series aluminum cap
Material	Aluminum
Size	8mm;11mm;13mm;20mm;30mm
Logo	Can be customized
Colour	Customized
Pack	Customized
Usage	For vial bottles
Origin	China
Lead time	5-10 days after receiving the advance payment
Payment terms	T/T,L/C,Paypal,Western union,MoneyGram and etc.

Model NO.	13mm mesopore series aluminum cap
MOQ	50,000pcs
Technics	Punching and Injection Mold
Transport Package	Inner PE Bag, Outside Carton Box
Size	13mm
HS Code	8309900000

Model NO.	8mm mesopore series aluminum cap(for Cartridges Glass Vial)
MOQ	100,000pcs
Transport Package	Inner PE Bag, Outside Carton Box
Technics	Punching and Injection Mold
Aluminum Part	8011-H16 with Coating
Size	8mm
HS Code	8309900000

COLOR:SILVER

COLOR:ROSE

COLOR:GOLDEN

Model NO.	20mm mesopore series aluminum cap
MOQ	50,000pcs
Technics	Punching and Injection Mold
Transport Package	Inner PE Bag, Outside Carton Box
Size	20mm
HS Code	8309900000

Model NO.	11mm mesopore series aluminum cap
MOQ	50,000pcs
Technics	Punching and Injection Mold
Transport Package	Inner PE Bag, Outside Carton Box
Size	11mm
HS Code	8309900000

Model NO.	30mm mesopore series aluminum cap
MOQ	50,000pcs
Technics	Punching and Injection Mold
Transport Package	Inner PE Bag, Outside Carton Box
Size	30mm
HS Code	8309900000

Seals for cartridges(8mm mesopore series aluminum cap)

Infusion Cap

Pull-Ring Cap

Our pull-ring Cap are suitable for ordinary infusion packages. The caps has the advantages of high safety, no leakage, no pollution, easy opening and so on. As the connecting device of the first generation of LVP product , the caps make the hospital injection issues convenient. People don't worry the outer pollution to the medicine any more. Now we have all kinds of sizes for your choices. Also, if you have any own requirements, pls feel free to contact us , we will do our best to serve you.

Product	Infusion Pull-Ring Cap
Material	High density PP
Size	28mm/32mm/38mm
Features	Ready-to-use Product Excellent compatibility with the solution Good welding property Sterilization temperature up to 121 °C Outer and inner caps are molded and assembled separately to avoid mixture Production and packaging under A+C Grade Clean Room
Samples	Free samples available for quality checking
Logo	can be customized
Colour	Customized
Pack	Customized
Usage	For infusion bottles and bags
HS Code	3926500000
Certificate	ISO9001,ISO4001,OHSAS18001
Delivery time	7 days after receiving the payment
Lead time	5-10 days after receiving the advance payment
Payment terms	T/T,L/C,Paypal,Western union,MoneyGram and etc.

This Plastic Cap assembled with High end Butyl Rubber. Our Pull-Ring Cap for plastic bottle has 3mm and 5mm thickness in its welding surface and the cap has the advantages of high safety, no leakage, no pollution, easy opening and so on. As the connecting device of the first generation of LVP product. You can also customize your order according to your needs. Isoprene Gasket can be an optional choice, high stable low fragment. If you are interested in our infusion Cap, please feel free to contact us , we will do our best to help you.

Break-Off Cap

Our infusion break-off Plastic Cap is mainly used for medical soft-bag and plastic bottle. Our Caps are produced in a clean plant which passes the GMP standard . From input to output , the products go through a series of standard procedures such as injection molding,automatic machinery assembly, sorting, inner packing and outer packing .

As the second generation Plastic Cap products, our break-off spout caps are produced with connecting device which have the advantages of high safety, no leakage, convenient opening, liquid-Adding infusion separation, and unique Rubber Gasket fixing tech. If you have interests in our Pp Cap, pls no hesitate to contact with us.

Infusion PP Port

Our connecting devices are designed for the soft infusion bag. It is produced with high safety, good stability, and excellent heat sealing temperature property. You can customize the products according to your own requirements.

Product Name	Infusion PP Port	Color	colorless
Place of Origin	Jiangsu, China	Brand Name	Longsheng
Model Number	28-42 mm	HS Code	3926500000
Properties	Medical infusion bags or bottles	MOD	10000 pcs
Delivery time	7 days after receiving the payment	Package	inner double PE bags, outer corrugated carton box (51*37*38cm), 3000 pcs per box.
Material	Polypropylene	Quality Certification	ISO9001/ISO14001
Instrument classification	Class III	Safety standard	GB15979-2002
UV absorption (220-240nm)	≤0.08	UV absorption (241-350nm)	≤0.05
Reducing substance (oxidizable)	≤1.5ml	Heavy metals (calculated as Pb)	≤0.00001%
Ammonium (calculated as NH ₄)	≤0.00008%	PH	5.0-7.0
Residue on evaporation	≤5.0 mg/100 ml	Turbidity	≤Suspensions 2

We now adopt advanced equipments and this make it reality to offer big production with high quality. Our ports have good welding performance in low welding temperature with technical patent and it helps increase product yield and reduce bag leakage rate. We are now trying our best to develop new types, your unique needs and ideas will be greatly appreciated.

Contact Lens Container

Contact lens container, a kind of polypropylene packaging material for storing contact lenses, is widely used for storing contact lenses with short abandoned cycles. A sterile barrier system can be formed after the hydrated lens and appropriate buffer solution are put into the PP cup and sealed by hot pressing with aluminum foil. After high temperature sterilization, the system can ensure that the lens and buffer solution in the system are in a sterile state.

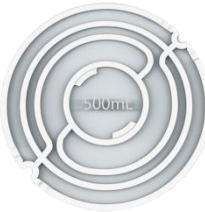

Material	PP
Package	inner double PE bags, outer corrugated carton box(58*37*24cm), 5000 pcs per box.
MOQ	50000 pcs
Delivery time	7 days after receiving the payment

Quotation	According to your drawing(better with material, mold life, etc)
Mold Material	P20/718/738/NAK80/S136/2343/Etc.
Process type	Injection Molds/ Die Casting Molds
Mold Components Standard	DME/HASCO/Etc.
Surface Treatment	Polish/Texture/Mirror-Polishing
Tool Life	100K~1000K shots
Quality inspection process	IQC IPQC OQC FQC
Lead Time	25~40 days base on the mold size and structure.
Quality System	ISO 9001: 2015

Infusion Bottle Hanger

Infusion bottle hanger when used for clinical transfusion bottle sets, it is characterized by using planar disc structure, the suspension loop, the nursing bottle ring, ring of bottleneck of three different diameter circle bearing each other in the same plane.

Infusion bottle hanger					
model	50ml	100ml	250ml	500ml	1000ml
Material	PE				
Use for	50,100,250,500,1000ml medical injection bottles				
MOQ	50000 pcs				
Origin	china				
Package	sterile inner bag packing and corrugate box outer packing.				
Certificate	ISO9001,ISO4001,OHSAS18001				
Delivery time	7 days after receiving the payment				
Lead time	5-10 days after receiving the advance payment				
Payment terms	T/T,L/C,Paypal,Western union,MoneyGram and etc.				

The ring are connected by a connection between the bottle set of simple structure, easy to carry and storage, using a molding manufacture injection molding machine, the production cost is low, easy to use and safe.
